

... Company Profile ...

Driving Excellence in Petroleum Services & Engineering Solutions !

WWW.APAR-EGYPT.COM

About the Company

Apar Is A Specialized Company In Engineering Manufacturing, Metal Fabrication, Petroleum Services, And Fuel Station Management. Since Its Establishment In 2008, The Company Has Been Providing Comprehensive Solutions For The Oil And Gas Sector, Adhering To The Highest Standards Of Quality And Safety. Its Services Include Manufacturing Steel Structures And Fuel Storage Tanks, Preparing Drilling Sites, And Supplying Petroleum Products, As Well As Working In The Construction And Contracting Sector. With Its Expertise And Efficiency, Apar Aims For Market Leadership And Expansion Both Locally And Internationally

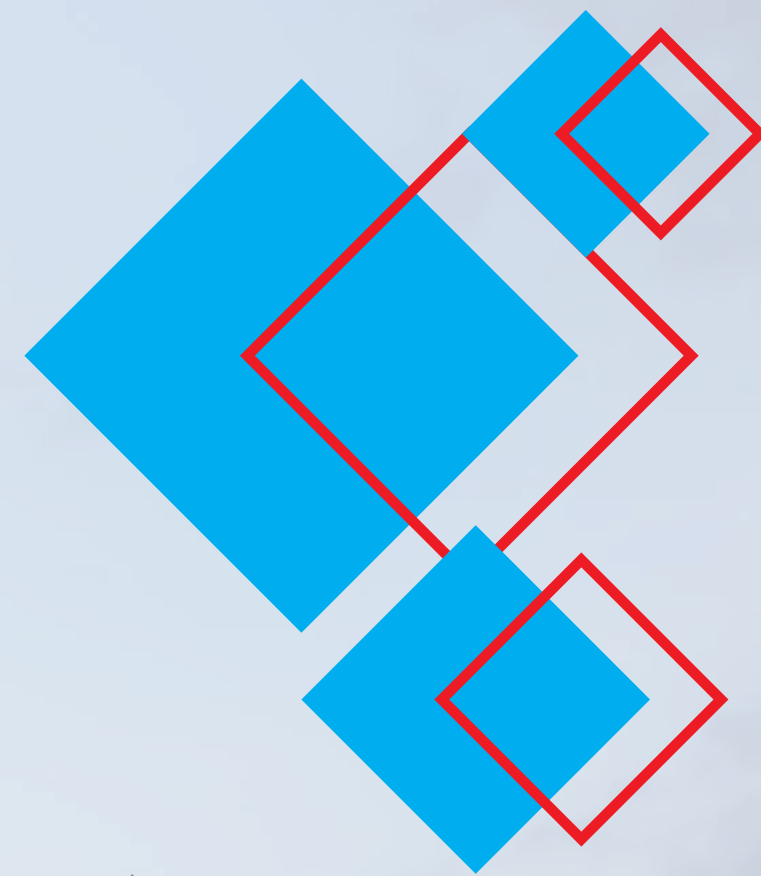

who we are

Apar Petroleum Services Was Established In 2008 By Eng. Haitham Antar And His Partners, Becoming One Of The Leading Companies In Petroleum Contracting, Engineering Manufacturing, And Fuel Station Management And Operation. The Company Relies On A Team Of Highly Experienced Engineers And Technicians Who Have Worked On Major Projects In Turkey, The Gulf Region, Egypt, And Libya, Ensuring The Delivery Of Comprehensive Solutions That Meet Global Standards.

Apar Is Committed To Delivering Its Services With The Highest Standards Of Quality And Occupational Safety, With A Focus On Innovation, Operational Efficiency, And Adherence To International Specifications. Thanks To Its Highly Qualified Team And Extensive Expertise, The Company Strives To Strengthen Its Role In The Oil And Gas Sector And Expand Into Local And International Markets By Offering Specialized Engineering Services, Advanced Waste Management Solutions, And Integrated Petroleum Projects.

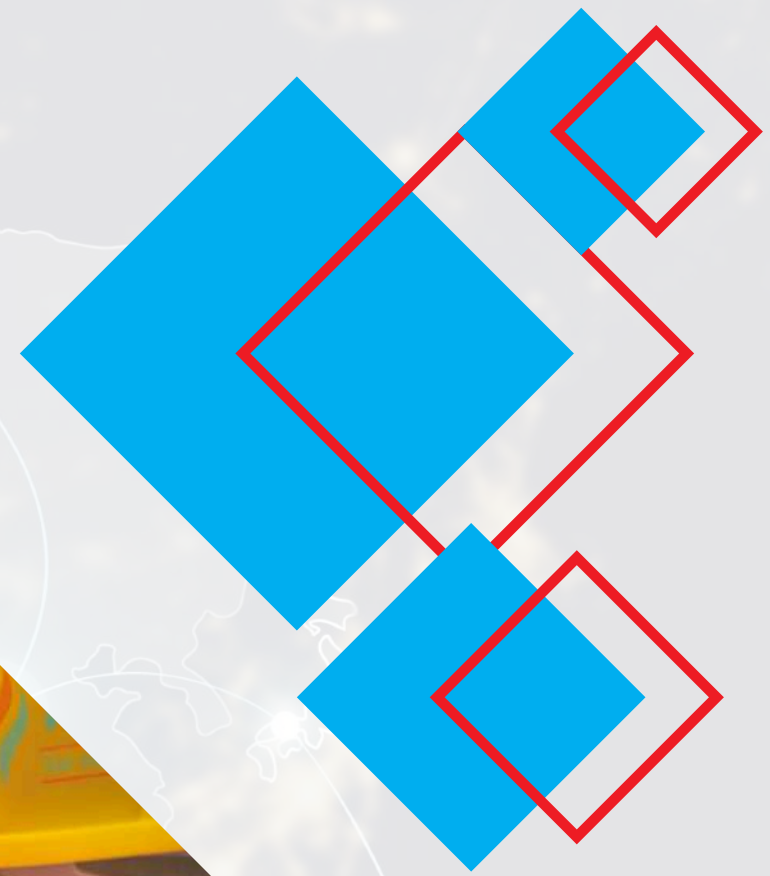

In Addition To Its Core Activities, Apar Also Provides Construction And General Contracting Services Following Quality And Safety Standards, Reinforcing Its Ability To Offer Comprehensive Solutions To Clients Across Various Sectors.

Vision

Apar Petroleum Services Aims To Achieve Local And Regional Leadership In The Petroleum And Engineering Services Sector Through Strategic Expansion In Local And International Markets, While Building Long-term Partnerships Based On Credibility, Commitment, And Quality. The Company Believes That Expertise And Technical Proficiency Are The Key Pillars Of Success And Continuously Works On Developing Its Operational Capabilities And Enhancing Its Presence In Regional And Global Markets By Providing Integrated Solutions That Meet The Highest International Standards In The Energy And Infrastructure Sector

Mission

....

Apar Is Committed To Delivering Advanced Engineering And Manufacturing Services And Efficient Operational Solutions In The Oil And Energy Sector. The Company Relies On Deep Expertise And Modern Technologies To Ensure That Projects Are Executed With The Highest Levels Of Precision And Efficiency. Apar Focuses On Creating Added Value For Its Clients Through Sustainable And Reliable Solutions That Enhance The Efficiency Of Petroleum Operations And Achieve Operational Goals Effectively.

....

Core Values

Professionalism

Working With Precise Standards And A Structured Approach To Ensure Excellence In Performance

Development & Innovation

Adopting The Latest Technologies And Manufacturing Techniques To Maintain Sector Leadership

Safety & Sustainability

Committing To Providing A Safe Work Environment And Environmentally Responsible Solutions

Partnership & Trust

Establishing Strong Relationships With Clients And Partners Based On Transparency And Credibility.

Why Choose Us?

Diverse Services & Comprehensive Solutions

We offer a wide range of engineering manufacturing, fuel station management, general contracting, environmental waste management, and petroleum supply services, making us a fully integrated partner capable of meeting client needs at every operational stage

Strategic Partnerships & Continuous Expansion

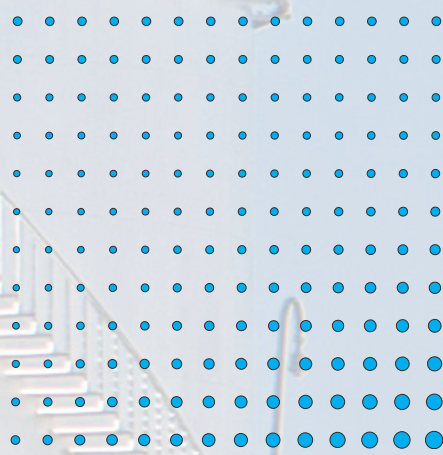

We are continuously expanding locally and regionally by building international partnerships based on credibility, commitment, and quality, which strengthens our market position and ensures the sustainable development of our services

Specialized Expertise & Qualified Teams

We have a team of highly skilled engineers and technicians with over 15 years of experience in the oil, energy, and construction sectors, ensuring precise and efficient project execution in compliance with global standards.

Strict Commitment to Quality & Safety Standards

We adhere to the highest quality and safety standards across all operations. As highly specialized professionals, we strictly follow international regulations and guidelines to ensure a safe and sustainable work environment

Our Services

1

Specialized
Engineering
Manufacturing

3

Environmental
Waste Management
Services

5

Logistics &
Petroleum Product
Supply

7

General Contracting
& Construction

2

Specialized
Petroleum
Contracting

4

Fuel Station
Management &
Operations

6

Engineering &
Petroleum Consultancy
Services

1

Specialized Engineering Manufacturing

- Designing And Fabricating Custom Steel Structures For The Oil And Gas Sector, As Well As Metal Fabrication For The Construction Industry
- Manufacturing And Supplying Drilling Cuttings Containers, Mud Tanks, Fuel Tanks, And Acid Tanks, Following The Highest Quality And Safety Standards.

Specialized Petroleum Contracting

- Constructing and equipping fuel stations according to international standards.
 - Executing infrastructure projects, concrete structures, steel structures, and industrial warehouses.
- Supplying equipment and services for oil and gas fields, including:
 - Solids control equipment such as shale shakers, desanders, desilters, and centrifuges.
 - Leasing mud mixing and storage plants, cement silos, acid tanks, and diesel tanks.
 - Providing high-performance filtration units for drilling fluids treatment using the latest technologies.
 - Maintenance and servicing of heavy equipment used in drilling sites to ensure optimal operational efficiency.

Environmental Waste Management Services

- Providing Waste Management Solutions Based On The 3R Principle (Reduce - Reuse - Recycle)
- Implementing Dry Location Systems For Waste-free Drilling Operations To Minimize Environmental Impact In Line With Global Standards.
- Processing And Transporting Petroleum Waste Using Advanced Technologies Compliant With International Environmental Regulations, Including Solid-liquid Separation And Secondary Drying.

4

Fuel Station Management & Operations

- Managing And Operating Fuel Stations In Accordance With The Latest Operational And Technical Standards
- Implementing Integrated Management And Safety Systems To Ensure Operational Efficiency And Exceptional Service.
- Developing And Upgrading Fuel Station Infrastructure To Meet Environmental And Quality Standards

5

Logistics & Petroleum Product Supply

- Wholesale Trade Of Solid, Liquid, And Gaseous Fuels, As Well As Associated Products, Greases, And Industrial Bitumen, Following The Highest Storage And Transportation Standards
- Distributing Hydraulic Oils And Engine Lubricants For Equipment And Industrial Sites, Ensuring The Supply Of Premium-quality Products To Meet Customer Demands.

The Vertical Pressure Leaf or Diatomaceous Earth (DE) filter unit is a fully enclosed system equipped with all necessary auxiliaries for efficient filtration. With its large surface area, it can process fluids with a high dirt load at a high flow rate while achieving low NTU. The design ensures a laminar flow through the vessel and filter leaves, extending the filtration cycle and minimizing NTU output. There is no need to open the vessel during cleaning, reducing downtime by up to 90% compared to conventional systems.

6

Engineering & Petroleum Consultancy Services

- Providing Comprehensive Drilling Consultancy, Including Drilling Fluids And Specialty Chemicals To Optimize Operations
- Supporting Early-stage Oil Production And Field Performance Enhancement Through Advanced Engineering Solutions.
- Supplying Specialized Technical Manpower (Local And International) To Support Drilling And Production Operations, Ensuring The Highest Industry Standards.

General Contracting & Construction

- Construction & Building – Execution Of Residential, Commercial, And Industrial Projects Using Cutting-edge Engineering Techniques.
- Finishing & Maintenance – Interior And Exterior Finishing, Renovation, And Restoration Of Buildings And Structures.
- Project Management & Consultancy – Providing Planning, Supervision, And Engineering Design Services To Ensure Efficient And High-quality Project Execution.

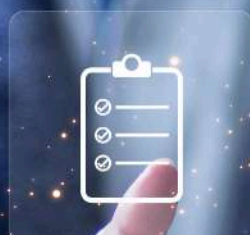

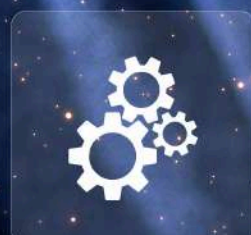

Licenses, Certifications, and Accreditations

Apar Petroleum Services, Supplies, and General Contracting is committed to applying the highest standards of quality, safety, and environmental management in all its operations by adhering to internationally recognized standards in the oil and gas sector.

The company is currently in the process of obtaining the following certifications to further validate its commitment to excellence:

- ✓ ISO 9001 – Quality Management System, ensuring the provision of world-class engineering and manufacturing services.
 - ✓ ISO 14001 – Environmental Management System, ensuring the application of best practices in petroleum waste management and minimizing environmental impact.
 - ✓ ISO 45001 – Occupational Health and Safety Management System, ensuring a safe work environment for employees, workers, and contractors across all operational sites.
- Apar is actively working towards obtaining these certifications while already implementing the required international standards, reinforcing its reliability and dedication to quality and sustainability.
